Eye Screening Camps Transforming Lives in Jagatsinghpur, Odisha!

Care Netram organized an eye screening camp in association with a local social worker at Jyoshna. We provided essential eye care services to over 130 residents. The camp not only provided eye screenings but also distributed free eyeglasses to 100+ individuals, sparking joy and gratitude among the villagers.

A Religious Worker In Cuttack Receives Good Vision Glasses

Janardhan Mohapatra, a 39-year-old priest from Nayak Sahi, Mangalabag, Cuttack, faced challenges due to poor vision. Financial constraints kept him from seeking medical help until he discovered Care Netram's free eye checkup camp.

After receiving powered glasses at the camp, Janardhan could see clearly. He gratefully accepted them, thanking Care Netram for the affordable solution that corrected his poor vision.

Fostering Eye Health & Wellbeing Among Rural School Children

Addressing vision impairment is crucial for a child's overall well-being and academic success. Early detection of vision issues is the key to preventing further deterioration and avoiding potential vision loss among children.

In collaboration with the Rotary Club, we organized a school eye screening camp at Beena Bharati Vidya Mandir, **benefiting 200+ students and community members**. Over 20 students identified with vision impairment received free vision supporting glasses.

Enabling Field Workers to SEE and WORK Better

Vision impairment poses a significant barrier to work efficiently, often resulting in job loss for many individuals. In remote areas where access to vision care is limited, workers face challenges in receiving timely treatment, potentially leading to blindness.

We at Care Netram conducted free eye screening camps for TATA Steel Field Workers in Odisha. **Over 100+ employees benefited from the initiative, with 40+ staff members receiving vision-supporting glasses.** We thank TATA Steel for inviting us to conduct eye screening camps and fostering good vision, good life among workers.

Giving The Gift Of Vision

Living in Delta Colony, Barmunda, the couple faced the challenge of detected cataracts requiring surgery. However, financial constraints and unawareness prevented them from taking eye test or treatment.

Care Netram's outreach program helped the couple get diagnosed and were sponsored with safe cataract surgery. This transformative intervention not only restored their vision but also significantly lowered the risk of eventual blindness.

Ramesh and Minaki expressed their heartfelt thanks to Care Netram for not just delivering medical care but for embodying a service that transcended physical boundaries, bringing joy and relief to their lives.
